For Your Information... **Customer Order Fulfillment for OCD Donor Screening Products**

Ortho-Clinical Diagnostics, Inc. (OCD) is pleased to provide you with the following **updated** information about fulfillment of customer orders for Donor Screening products. Customers have inquired about lot numbers assigned to their orders and the minimum amount of shelf life that remains for the product lot(s) shipped. Our current practice is to attempt to fulfill a customer order with a single product lot number and to ensure that the requested products have the minimum shelf life indicated in the table below, *or longer*, at the time a product lot is allocated to the order. Customers may receive non-consecutive lot numbers in their product shipments as a result.

Donor Screening Product Description	CAT. No.	<u>Minimum</u> Expiration Dating*
Avioq [®] HTLV I/II Microelisa System	200192, 200576, 209600	45 Days
ORTHO [®] HCV Version 3.0 ELISA Test System	930740, 930750	45 Days
